Summary

Final-year B.Tech student and Product Intern with hands-on experience in user research, competitive benchmarking, and workflow optimization, including cutting a core dashboard flow from **7 to 3 steps** and reducing tournament setup time by **90%**. Skilled at turning user feedback and data into clear PRDs and shipping with engineering and design teams in fast-paced startup environments. Passionate about building products that solve real-world problems.

Education

National Institute of Technology (NIT), Uttarakhand — Srinagar, Uttarakhand
B.Tech in Electrical and Electronics Engineering — *Aug 2023 – May 2027*

Skills

Product Management: User Research, Competitive Benchmarking, User Journey Mapping, PRDs, Roadmap Execution, Agile/Scrum

Data & Analytics: Drop-off Analysis, A/B Testing, Excel, Google Sheets, LLM Evaluation, Python

Research & Design: Friction Analysis, Workflow Optimization, Wireframing, UI/UX Design, Figma

Tools & Technical: Jira, React, Node.js, REST APIs, GenAI APIs, Prompt Engineering, Git

Experience

Udhi Technologies — Remote
Product Management Intern (AI EdTech) — *Aug 2026 – Present*

- **Feature Ownership:** Own the UI/UX design and testing of features shipped to production, working closely with engineering to define requirements and deliver improvements.
- **User Research to PRDs:** Convert discovery calls and user feedback into structured PRDs and user journeys, mapping requirements to reduce user drop-offs.
- **Competitor Research:** Benchmarked user workflows across **5+** digital platforms, synthesizing learnings into baseline metrics and product improvement recommendations.
- **Team Leadership:** Manage a frontend intern, assigning tasks and tracking turnaround times to keep delivery fast and on schedule.
- **LLM Evaluation:** Design rubrics and qualitative scoring frameworks to measure the quality and reliability of LLM outputs.

Eshway — Mumbai, Maharashtra
Product & Web Intern — *Mar 2025 – Jun 2025*

- **User Journey Improvements:** Identified friction points and streamlined the core Live Tracking Dashboard workflow from **7 to 3 steps**, improving user experience and cutting backend API latency by **15%**.
- **Process & Requirements:** Authored PRDs for a centralized developer-update pipeline, replacing manual operational syncs and surfacing delays in project turnaround times.
- **GenAI Automation:** Designed automated reporting workflows using OpenAI and Gemini APIs to log cross-platform developer activity across Slack and GitHub.

Projects

Battledore – Tournament Management Platform — 2025

- **User Research:** Mapped existing setup flows and interviewed organizers to isolate coordination bottlenecks, define MVP feature specs, and recommend UI improvements.
- **Shipped MVP:** Deployed an automated bracket-generation MVP that removed manual work for event managers.
- **Impact:** Reduced tournament setup time by **90%** (from 2 hours to under 10 minutes).

Achievements

- **Intern of the Month (Apr 2025) & Letter of Recommendation:** Recognized at Eshway for product contributions, workflow optimizations, and tracking improvements.
- **First-Author Paper, IEEE DELCON'26:** Accepted after peer review (24% acceptance rate) on Robust Super-Twisting Sliding Mode Control for DC-DC Buck Converters.
- **Top 300 Regional Rank, IOQM 2020:** Ranked within the top 300 in the Indian Olympiad Qualifier in Mathematics.
