Summary

Final-year B.Tech student and PM Intern experienced in competitive benchmarking, mapping user journeys, and optimizing core product workflows. Proven ability to break down complex user flows, identify friction points, and coordinate with cross-functional engineering and design teams to build seamless digital experiences. Passionate about driving product strategy and scaling user-centric solutions to solve real-world problems.

Education

National Institute of Technology (NIT), Uttarakhand — Srinagar, Uttarakhand
B.Tech in Electrical and Electronics Engineering — *Aug 2023 – May 2027*

Skills

Product Management: Competitive Benchmarking, User Journey Mapping, PRDs, Roadmap Execution, Agile/Scrum
Research & Design: User Research, Friction Analysis, Workflow Optimization, Wireframing, UI/UX Design
Product Analytics & AI: A/B Testing, Excel, LLM Evaluation Rubrics, Prompt Engineering, GenAI APIs
Tools & Technical: Jira, Figma, Google Sheets, Python, React, Node.js, REST APIs, Git

Experience

Udhi Technologies — Remote
Product Management Intern (AI EdTech) — *Aug 2026 – Present*

- **Execution Support & Design:** Own the design and testing of UI/UX shipped to production, coordinating closely with engineering to define and execute requirements for new feature improvements.
- **Competitive Benchmarking:** Analyze and benchmark user workflows across 5+ digital platforms, synthesizing key learnings to define baseline metrics and suggest product improvements.
- **User Journey Requirements:** Break down discovery calls and user feedback into structured PRDs, mapping functional requirements to eliminate user drop-offs.
- **Team Leadership:** Manage a frontend intern, assigning development tasks and tracking completion turnaround times to ensure efficient product delivery.
- **LLM Evaluation:** Design rubrics and qualitative scoring frameworks to validate the fidelity of LLM outputs.

Eshway — Mumbai, Maharashtra
Product & Web Intern — *Mar 2025 – Jun 2025*

- **User Journey Improvements:** Streamlined core Live Tracking Dashboard workflows from **7 to 3 steps**, successfully identifying friction points to enhance user experience and cut backend API latency by **15%**.
- **Fulfillment Tracking:** Authored PRDs centralizing developer update pipelines, eliminating manual operational syncs, and highlighting inefficiencies in project turnaround times.
- **GenAI Automation:** Designed automated reporting workflows using OpenAI and Gemini APIs to log cross-platform developer activity across Slack and GitHub.

Projects

Battledore – Tournament Management Platform — 2025

- **Onboarding & Flow Optimization:** Mapped current setup flows and interviewed organizers to isolate coordination bottlenecks, define MVP feature specs, and recommend simple UI improvements.
- **Impact:** Radically improved the onboarding journey, reducing tournament setup turnaround time by **90%** (from 2 hours to under 10 minutes).
- **Execution & Automation:** Deployed an automated bracket-generation MVP to eliminate manual modifications and operational overhead for event managers.

Achievements

- **Intern of the Month (Apr 2025) & Letter of Recommendation:** Recognized for exceptional product contributions, workflow optimizations, and tracking improvements at Eshway.
- **First-Author Paper, IEEE DELCON'26:** Accepted after peer review (24% acceptance rate) on Robust Super-Twisting Sliding Mode Control for DC-DC Buck Converters.
- **Top 300 Regional Rank, IOQM 2020:** Ranked within the top 300 in the Indian Olympiad Qualifier in Mathematics.
